BREEDING SOUNDNESS EVALUATION (BSE)

Horse Information

HORSE'S NAME:

COAT:

GENOTYPE:

GENDER: STALLION

BREED:

AGE: years old

REGISTERED STABLE:

Laboratory Analysis:

- Volume (mL): 85 mL
- Concentration (million sperm/mL): 350 million/mL
- Total sperm per ejaculate: 29,750 million
- Progressive motility (%): 75%
- Total motility (%): 85%
- Morphology (normal vs abnormal %): 95% normal / 5% abnormal

Reproductive Exam

- Testicle size: 12 x 11 cm (both testes)
- Symmetry and firmness of testes: Symmetric, firm, normal consistency
- Epididymis palpation findings: Normal, no swelling or abnormalities
- Shaft and prepuce inspection: Healthy, no lesions or discharge
- Accessory sex gland evaluation: Normal, no enlargement
- Any abnormalities or lesions: None observed

Semen Evaluation

Collection Method: (Artificial mare / breeding phantom / manual stimulation)

Assessment

- Fertile / Subfertile / Infertile
- Recommendations: Routine breeding as per schedule. No additional supplementation required. Repeat evaluation recommended annually or as needed.

Results

All findings within normal limits. Semen quality and reproductive anatomy indicate excellent breeding potential.
